## SOLAMEN, MISERIS.

**W**Hich causes Expectoration, and is an admirable Medicine for the Asthma, Prytick, Catarrhs, and Rheums: In a short time it takes off the tickling Defluxion that falls from the Head upon the Lungs; it opens and takes away all Stoppages and Pains of the Stomach, Lungs, and Chest, therefore an extraordinary

traordinary Remedy for the Consumptive. It Cures a new Cough, or Cold, though never so violent, in three or four times taking; and old Ones in a small time. It takes off all Loosness, and Vomiting, and Surfeits, especially after hard Drinking. The Measles, and Small Pox it brings out to Admiration. It is an Infallible Remedy for all windy Distempers, as the Colick, Gripping of the Guts; it is admirably comfortable to the Sciatick, and those that have Aches or Pains in their Limbs whatsoever. But for the Tooth-ach, I believe there is not the like Remedy, for in an Hour or less it gives ease, whether the pain be in a sound or rotten Tooth, in one or all the Teeth; not by stopping them, but by taking it inwardly. it dispels the Rheum that causes the Pain; as yet it never fail'd me. The first Dose takes off the violent pain, the next perfectly cures it. *Price 1 s. 6. d. the Pot.*
